# Increment ++ in JavaScript

Daily Dose of Coding  
with Cuteness

# Postfix Increment

Notice here that the **value** is first **returned** **before** being **incremented**

Postfix  
Meow!

```
>
function incrementMeow1(x,y) {
    if (y == 0) {
        return x++;
    }
    else
    {
        return x;
    }
};
```

```
incrementMeow1(10,0)
```

```
< 10
```

X++

Follow us meow!

# Prefix Increment

The **value** gets **incremented** first,  
**before** being **returned**

```
> function incrementMeow2(x,y) {  
    if (y == 0) {  
        return ++x;  
    }  
    else  
    {  
        return x;  
    }  
};
```

**++x**

```
incrementMeow2(10,0)
```

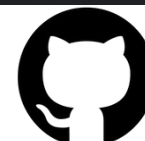

```
< 11
```

Hi amazing you!  
Let's be friends!  
Add Meow!

 **/kittycat**

 **kittycat-tech**

**Sweet and friendly**  
(I code randomly with paws)
